The Right Skill. The Right Time. The Right Place.

Everest HealthCare is the answer when searching for comprehensive patient-centered care at home and community setting. We believe in patient-centered care that is respectful and responsive to individual patient preference, needs and values, an ensuring that patient values guide all clinical decisions.

Everest HealthCare Solutions (EHS)

Everest HealthCare Solutions (EHS) is a patient centered medical home company. EHS believes in a holistic patient centered care and utilizes multidisciplinary team approach to reach the best optimum healthcare outcomes. EHS utilizes evidence-based practices to support its clinical decisions in the field. We integrate Health Information technology and telehealth to promote communication in a speedy manner among multidisciplinary teams to address patient's immediate needs. Our case management team works collaboratively with the field staff and physicians to ensure patients reach their maximum functional potential. The innovative approach to patient wellness involving technology with disease management, care coordination, case management, telehealth, and multidisciplinary team has created EHS as the leading organization to provide exceptional care in the community.

We're a Team

Our team of professionals works in conjunction with the physicians to deliver the highest quality of healthcare. The primary care physician or any other specialty care physicians can sign up with EHS to access the physician's portal to view the patient's holistic care in the field and generate orders to be carried out in a quick manner to promote rapid recovery in patient and gain quick independence.

Our Team Includes:

- Care Coordination Managers
- Disease Management Specialist
- Physicians
- Registered Nurses
- Physical Therapists
- Occupational Therapists
- Speech-Language Pathologists
- Registered Dietitian
- Medical Social Workers
- Home Health Aides
- Care Giver Services

Our Diagnostics Integration Model

We recognize the importance of providing diagnostic work up in timely manner to promote optimum recovery and prevention in the disease process. Diagnostics provided at home are the following: Lab Draws, X-rays, Ultrasounds (Abdominal, renal, pelvic, scrotum, thyroid, breast, liver, abdominal, and bladder screenings), Cardiovascular studies (Holter Monitoring, 2-D mode echo, carotid Doppler, arterial & venous upper or lower Doppler), Sleep studies and overnight pulse oximetry.

Eligibility

All Medicare beneficiaries can receive medical home services as long as the patient meets the following criteria: 1) Patient must be homebound. Homebound: Condition keeps a patient from leaving home without help of a wheelchair or a walker, needing special transportation, or getting help from another person. Leaving home takes a considerable taxing effort. 2) Patient must be under care of a doctor, services under the plan of care established and reviewed regularly by a physician. 3) A Physician must certify that the patient needs one of the following: Intermittent nursing care, or therapies. **A person may leave home for medical treatment or short period of time for non-medical reasons.**
